### **InformationLeader 4.2 Released**

We are proud to announce the release of InformationLeader 4.2!

The 4.2 upgrade focuses on the refinement and extension of existing functionality. New features and enhancements are driven by customer feedback and backed by industry experience.

New features include support for barcode devices, interaction with third party data sources, enhanced reporting capabilities, and many more changes and enhancements designed to increase data accuracy and reduce redundancy. These new features complement across the board system performance gains.

Visit our website to find out more or contact a reseller to discuss your upgrade options today.
