### **Golden Circle realises QA vision through InformationLeader**

Golden Circle is Australia's largest grower-owned processing company, providing high quality, value-for-money products worldwide. Their existing Quality Assurance (QA) process resulted in numerous inefficiencies and performance gaps. Their QA vision was a centralised database for their entire quality management system. They realised this vision with InformationLeader.

"Knowing what's happening in the business is the most important thing for us. InformationLeader provides us with a simple tool that allows detailed monitoring and reporting on our business."

-Peter Swain: Technical Services Manager

Find out more about InformationLeader at Golden Circle and at other successful businesses from a wide range of industries on the Case Studies page at [www.InformationLeader.com](http://www.InformationLeader.com)
